Enabling updates for all Microsoft products on Windows 10

1. Click on the "Start menu".

2. Click on "Settings".

3. Click on "Update & security".
4. Select "Advanced options".

5. Enable the check box "Give me updates for other Microsoft products when I update Windows".

6. Click on the return arrow.
7. Click on "Check for updates".

8. If there are updates available they will be automatically downloaded and installed.
9. If your computer need to restart, you can choose to restart immediately or you can close the window to delay the restart.
